

Solutions and initiatives in stormwater management

BALTIC FLOWS

2nd of December 2014,
Ministry of Environment -
Narva mnt 7a, Tallinn,
Estonia

Tallinn workshop allows stakeholders in the Baltic Sea Region (BSR) to find potential joint activities and funding. Workshop provides an opportunity to demonstrate innovative solutions to public sector representatives.

Exhibition area

Expo information

Organisations from Estonia, Latvia, Finland, Germany and Sweden are expected to participate in the workshop. **Event is free of charge. The first 10 organisations from each country are accepted to exhibit their solutions.**

About 2m² of space, chair(s), WiFi connection and electricity will be available for each organisation in the exhibition area.

Upon request extra space will be available for each country.

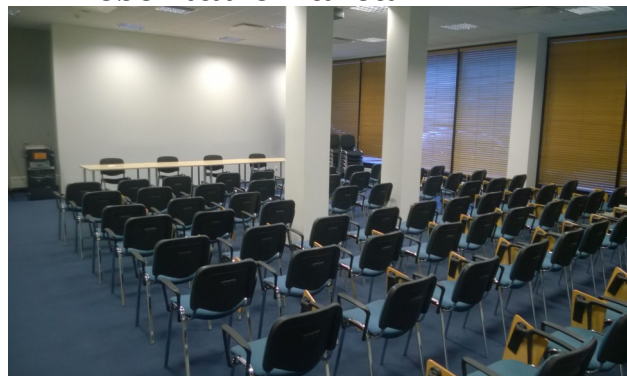

If you are interested in attending please confirm your participation before 14th of November.

Organisations that can not participate will have an opportunity to demonstrate their products and solutions on screens to be displayed in exhibition area throughout the day.

Presentation area

Reasons to attend

For product or service providers:

Opportunity to demonstrate technological solutions to public sector representatives and other organisations from 5 different countries.

For all participating organisations:

Opportunity to find potential co-operation partners and service providers. Ideal place to market services, share information and apply for future funding of joint initiatives. All participants can find common BSR cluster initiatives they want to take part of.
