

Monitoring solutions for stormwater management

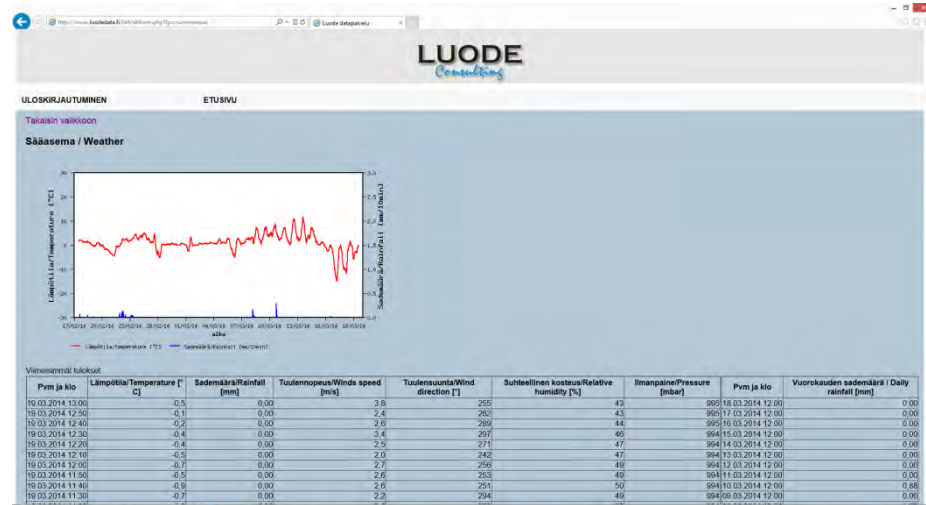

LUODE
Consulting

Why Continuous Monitoring?

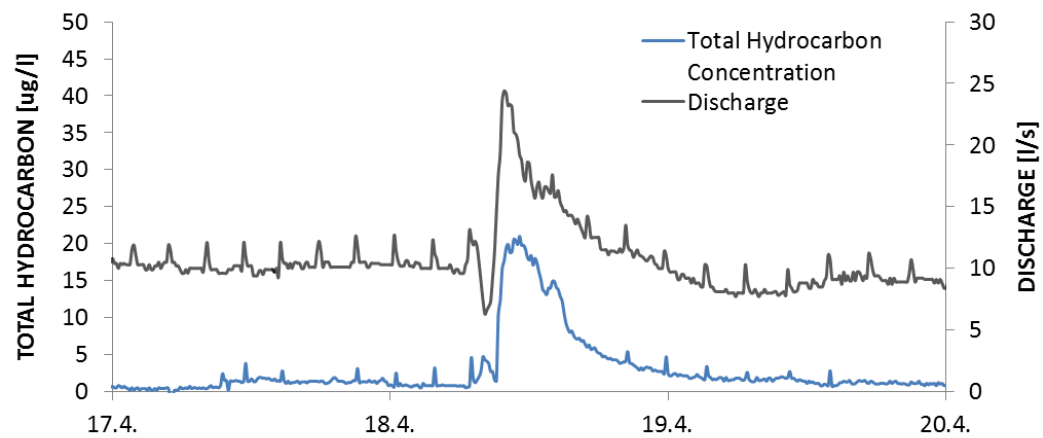

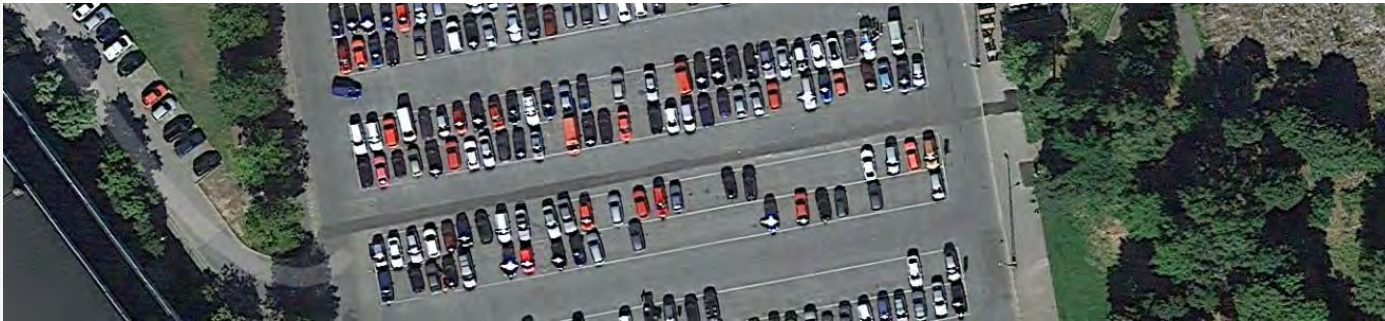

Luode continuous monitoring stations

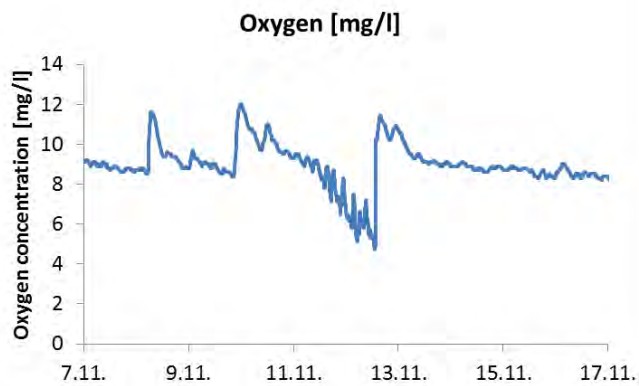

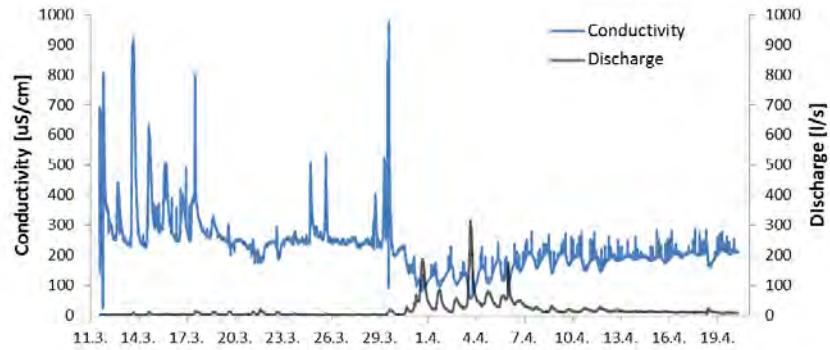

- Real time monitoring of hydrological, water quality and weather parameters utilizing the latest sensor technology
- Sensors can be installed to all water systems (stormwater pipeline network, ditch, open channel, river, reservoir, lake and sea)
- Stations are based on Luode-datalogger designed for Nordic environment
- Powered with batteries, suitable for both urban and remote areas
- Data transmission over GPRS modem
- Online data service for data observation and downloads
- Sensors are equipped with automatic cleaning system

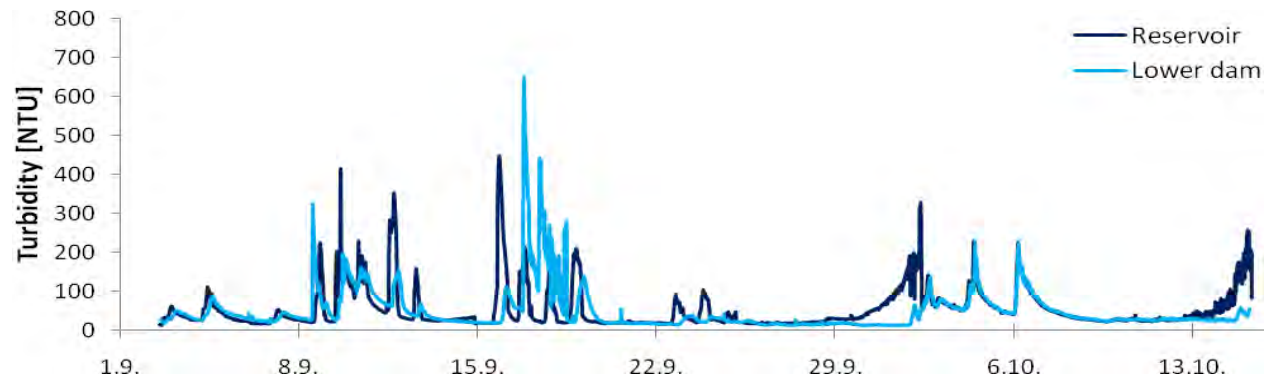

Oil in stormwater

Impacts of de-icing chemicals

Impacts of construction work
